

# Creating Jobs in Washington

Washington is ranked as one of the best states to start a business and build a highly skilled career. I believe our success is due to smart public investments in our workforce and our employers. That's why I helped pass legislation to spur job creation and approved major reforms to save businesses hundreds of millions of dollars.

The balanced budgets we passed last year, which are investing in our state's public projects and transportation system, will generate about 90,000 jobs, especially in the hard-hit construction industry.

We permanently reduced unemployment insurance taxes for more than 90 percent of Washington's employers saving them nearly \$300 million this year alone. Unemployed workers also win, with a \$25 boost in weekly benefits for new claimants.
