**Q2 To comply with the federal government, we have to maintain 45 mph 90 percent of the time in the HOT lanes. We often have two empty lanes because of the 3+ people in a vehicle requirement. What do you think of adjusting that down to 2+ people when speeds are above 45 mph, and bumping it back to 3+ when it falls below 45 mph? The other idea is having one HOT lane in the whole corridor instead of two.**
